

WHAT IS CLAIMED IS:

1. A ceiling fan blade comprising:

a top plate having solid patterns defined in a top surface thereof and a plurality of ridges defined in a bottom surface of the top plate, and

5 a bottom plate having a top surface which is adhered to the bottom surface of the top plate at a periphery of the top plate and the ridges.

2. The ceiling fan blade as claimed in claim 1, wherein a plurality of spaces are defined between the bottom surface of the top plate and the bottom plate.

10 3. The ceiling fan blade as claimed in claim 1, wherein a reinforcement ridge protrudes from a central axis of the top surface of the top plate.
